

CASE PACKERS

Our case packer solutions are designed to automate the efficient placement of products into cases with high speed, precision, and consistency reducing manual handling and minimizing product damage.

These systems are highly versatile, handling bottles, cartons, pouches, and containers across multiple configurations: top load, side load, wrap-around, and robotic.

Built with intelligent controls and user-friendly interfaces, they offer quick changeovers, compact design, and seamless integration with conveyors, case erectors, and palletizers for a complete end-of-line solution.

Benefits

- Operational efficiency
- Continuous operation
- Smart automation
- Energy efficient
- Low maintenance
- Stable handling
- Fast setup
- Compact design
- Process optimization
- Improved productivity
- Reduced downtime

Key Features

- High speed accurate placement
- Flexible multi product handling
- Quick case size changeover
- User friendly hmi controls
- Compact space saving design
- Reduced damage consistent packing
- Seamless line integration capability
- Advanced safety protection system
- Real time performance monitoring
